<sup>(5)</sup> For multisplit appliances, data shall be provided at a Capacity ratio of 1.

www.argoclima.com

<sup>(\*\*)</sup> If default Cd= 0,25 is chosen, then results from cycling tests are not required. Otherwise either the heating or cooling cycling test value is required

## **Product Fiche**

Model: GREENSTYLE PLUS 12000 UE / GREENSTYLE PLUS 12000 UI

Manufacturer: ARGOCLIMA SPA - via Alfeno Varo, 35 - Alfianello (BS) - Italy;

Sound power level (indoor unit / outdoor unit): 53 / 62 dB(A);

Refrigerant: R32

Refrigerant leakage contributes to climate change. Refrigerant with lower global warming potential (GWP) would contribute less to global warming than a refrigerant with higher GWP, if leaked to the atmosphere. This appliance contains a refrigerant fluid with a GWP equal to 675 .This means that if 1 kg of this refrigerant fluid would be leaked to the atmosphere, the impact on global warming would be 675 times higher than 1 kg of CO<sub>2</sub>, over a period of 100 years. Never try to interfere with the refrigerant circuit yourself or disassemble the product yourself and always ask a professional.

## **Cooling mode**

**SEER: 6,2** 

Energy efficiency class: A++

Pdesignc: 3,5 kW

Annual electricity consumption **198** kWh per year, based on standard test results. Actual energy consumption will depend on how the appliance is used and where it is located.

## **Heating mode**

Climate type: Average (-10°C) / Warmer (+2°C) / Colder (-22°C)

SCOP: 4,0 / 5,2 /-

Energy efficiency class: A+/A+++/-

Pdesignh: 2,7 / 3,4 /- kW

The back up heating capacity for SCOP calculation: # kW.

Annual electricity consumption **938/918/-** kWh per year, based on standard test results. Actual energy consumption will depend on how the appliance is used and where it is located.
